

Sridhar Elumalai

Full Stack Software Developer

Chennai, TN | 7871639757 | sridhare296@gmail.com | <https://sridhare29.github.io/sridhar>

PROFESSIONAL SUMMARY

Full Stack Software Developer with 4+ years building enterprise microservices using .NET Core and React.js. Delivered end-to-end features on Deloitte Omnia (audit & advisory platform) within Agile teams using Azure DevOps and CI/CD pipelines. Strong collaborator with creative, UX, QA, and product teams—adept at writing clean, scalable code and maintaining quality through two-level peer review with Technical Architects.

SKILLS

- **Languages:** C#, JavaScript, TypeScript
- **Frontend:** React.js, Redux, Next.js, HTML, CSS, Tailwind CSS, Vite, WebSocket, Playwright, React Hooks, .NET MAUI
- **Backend:** .NET Core, Web API, Node.js, LINQ, Dapper
- **Databases:** SQL Server
- **Cloud & DevOps:** Azure DevOps (Boards, Repos, Pipelines), Azure Functions, CI/CD
- **Practices & Tools:** Microservices & Micro Frontends, Git, Agile/Scrum, Unit Testing, Code Reviews

PROFESSIONAL EXPERIENCE

Associate Software Developer — Kanini Software Solutions

Apr 2022 – Present

Client Project: Deloitte Omnia — Audit & Advisory Platform

- Worked as a Full Stack Developer on Omnia, a large enterprise microservices-based application for Deloitte's Audit & Advisory practice, building and maintaining both front-end (React.js, Hooks, Redux) and back-end (.NET Core, Web API, LINQ, SQL Server) components.
- Designed and consumed RESTful microservices, connecting front-end interfaces to backend APIs to deliver seamless, reliable data flow across the application.
- Leveraged Azure Functions to build serverless, event-driven workflows, improving scalability and reducing infrastructure overhead.
- Managed day-to-day work using Azure DevOps Boards within an Agile/Scrum framework, participating in sprint planning, stand-ups, backlog grooming, and retrospectives.
- Built and maintained CI/CD pipelines in Azure DevOps to automate build, test, and deployment processes, ensuring fast and reliable releases.
- Followed a two-level Pull Request approval process, submitting code for review by peers and Technical Architects (TAs) to ensure adherence to coding standards, architecture guidelines, and best practices before merge.
- Designed component-based, reusable front-end architecture to improve scalability and maintainability across multiple modules.
- Conducted code reviews and unit testing, and implemented best practices to maintain high code quality across the codebase.
- Collaborated closely with UX/UI designers to translate wireframes into pixel-perfect, technically feasible interfaces.
- Communicated regularly with cross-functional team members and stakeholders, actively contributing to Agile ceremonies and project discussions.
- Demonstrated strong adaptability by quickly learning new tools and technologies to meet evolving project requirements.

PROJECTS

Miniti-Scrap

- An eco-friendly platform enabling users to recycle waste, earn rewards, and contribute to sustainability.
- Built a scalable, reusable architecture using .NET Core Web API and React.js, with state management handled via Redux.
- **Tech Stack:** React.js, Redux, .NET Core, Dapper, REST API, Tailwind CSS.

CERTIFICATIONS

- ASP.NET Core – SOLID and Clean Architecture
- Build ASP.NET Core Web API – Scratch to Finish (.NET 8 API)
- .NET MAUI Mobile App Development

EDUCATION

Bachelor of Engineering — Electronics and Communication Engineering

Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College

2018 – 2022

Activities and Societies: National Service Scheme (NSS)
